SILCA

Silca is the global brand of reference for the production of keys and the production of professional and industrial machines dedicated to key duplication. Silca has been responsible for the most important technological evolutions in key duplication such as the first electronic key cutting machine capable of copying keys by code. Silca machines are born from a

long tradition, from a know-how recognized at a global level and from the expertise and passion of engineers who understand keys in every detail.

QUALITY AND CERTIFICATIONS

Product quality is fundamental to Silca and we invest continuously to guarantee a level of quality that is both independently certified and designed to last. The recognition

received is the result of Silca's commitment to quality and sustainability.

SILCA HOLDS THE FOLLOWING STANDARDS:

- ISO 9001:2008,
- ISO/TS 16949:2009 (Automotive),
- UNI EN ISO 14001:04 (EMS),
- BS-OHSAS 18001:07

INTRODUCTION

MINDA SILCA ENGINEERING PVT LTD.

Minda Silca Engineering Pvt Ltd., was incepted in the year 2002 under A K Minda Group and was known as “Tuff Engineering Pvt. Ltd.” Based at Noida, this company made a humble beginning under AK Minda Group (now known as SPARK MINDA, Ashok Minda Group), to provide Key Solution to all the other group companies.

SPARK MINDA, Ashok Minda Group is a leading manufacturer of Automotive Security Systems, Driver Information Systems, Plastic Injection-Moulded Interior Parts, Die-Casting, Keys and Key Duplicating Machines. The Group caters to the needs of all major Car, Motorcycle, Commercial Vehicles, Tractor and off-road vehicle manufacturers in India and overseas. The Group operates from 35 plants located in India, Germany, Poland, Czech Republic, Indonesia, Vietnam, Uzbekistan with office in Japan. The Group also has several JVs with leading companies from USA, Japan, Italy, and Uzbekistan.

Minda Silca Engineering Pvt. Ltd. was formed in 2006, after a Joint Venture between Spark Minda,

Ashok Minda Group & Silca S.p.A, Italy (a member of Dormakaba Group with annual turnover of 2.1 Billion CHF). Silca is the flagship company in the key& wall solution business within Dormakaba Group. It is a leading European company for manufacturing key blanks, key-cutting machines and equipments dedicated to the production and key blanks processing. Silca also has a product range dedicated to key manufacturing and duplication & security products.

OUR VISION

“To be a dynamic, innovative and profitable precision component manufacturer for automotive as well as non-automotive organization with a special focus on keys & KCM, emerging as the preferred supplier and employer to create value for all stakeholders”

OUR MISSION

- Focusing on product innovation as the essential element to differentiate our offer.
- Looking after our customers needs granting them first class services.
- Upgrading of our production processes both in terms of efficiency and quality.

- Empowering human resources by means of continuous education and training as well as supporting professional growth within the company.
- Pursuing continuous improvement by promoting initiatives and responsibilities at individual and team level.

QUALITY & CERTIFICATIONS

Minda Silca holds the following standard –
IATF 16949:2016 (1st edition, 2016-10-01)
ISO 14001 : 2015 (Environment Management System)

MINDA SILCA BUSINESS MODEL

Minda Silca does not merely represent a trade name, it is an approach to the market, a constant and intense dedication to product quality standards and above all a guarantee of innovation and quality for all the people operating in the world of duplication services.

Minda Silca's Business Model is a combination of direct and indirect business covering all the available distribution channels, distributing a complete range of key blanks and key cutting machines dedicated to key cutters, Shoe Bars, Locksmiths and to Industrial users.

THE KEY CUTTING MACHINE MOST SUITABLE FOR YOU

This catalogue presents every key cutting machine, both mechanical and electronic, in a standard, easy to read format that gives the machine's key technical and functional characteristics to help you to choose the machine best suited to your needs.

For each machine, in addition to the technical characteristics, the main accessories are also detailed.

COMPARISON TABLES

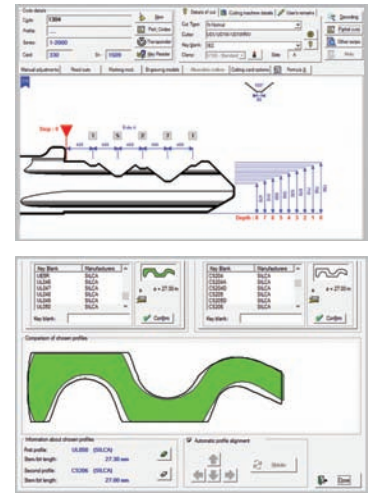

These sections developed by Silca experts, allow you to quickly compare the different models in the same family to understand the differences and decide which is

the right machine for your business. The comprehensive final summary table also allows you to see the whole range, across model families, by the types of keys cut.

SILCA SOFTWARE ACCESSORIES & SPARE PARTS

SILCA KEY PROGRAMS

(SKP) is the software platform developed by Silca to cut keys with the electronic key cutting machines using the original dimensions set by lock manufacturers, ensuring high quality and precise results. SKP has a modular structure to support different customer needs.

SILCA SOFTWARE INTERFACE (SSI)

Silca Software Interface is a software module that allows you to

import and manage .dat and .xml data typically used in the production of master key systems. The management of job queues optimizes the phases of key duplication and engraving; useful during installations.

CODE MAKER

Code Maker is an SKP module for creating key cutting cards not yet present in the Silca database. This function allows you to create cards for flat, dimple, bit, double bit and pump keys.

SILCA OEM CLIENT

Silca OEM Client (SOC) is a software functionality that allows authorized locksmiths to copy Mottura®, Ewa® and Assa® keys. The function ensures full traceability of the duplicates, which are archived and tallied. The OEM transmits the encrypted cutting parameters directly to the machine, guaranteeing the highest level of security in the key duplication service.

ACCESSORIES & SPARE PARTS

OPTIONAL ACCESSORIES

The same passion and attention to detail dedicated to the design and creation of every key cutting machine is also applied to the range of Silca accessories.

Clamps, jaws, feeders: every component is studied based on the structure of the machine for which it will be used.

ORIGINAL SPARE PARTS

Original Silca spare parts are made from the highest quality materials, assembled with maximum care and precision tested.

They are made to ensure that optimum performance and precision levels last over time.

ORIGINAL COSUMABLES

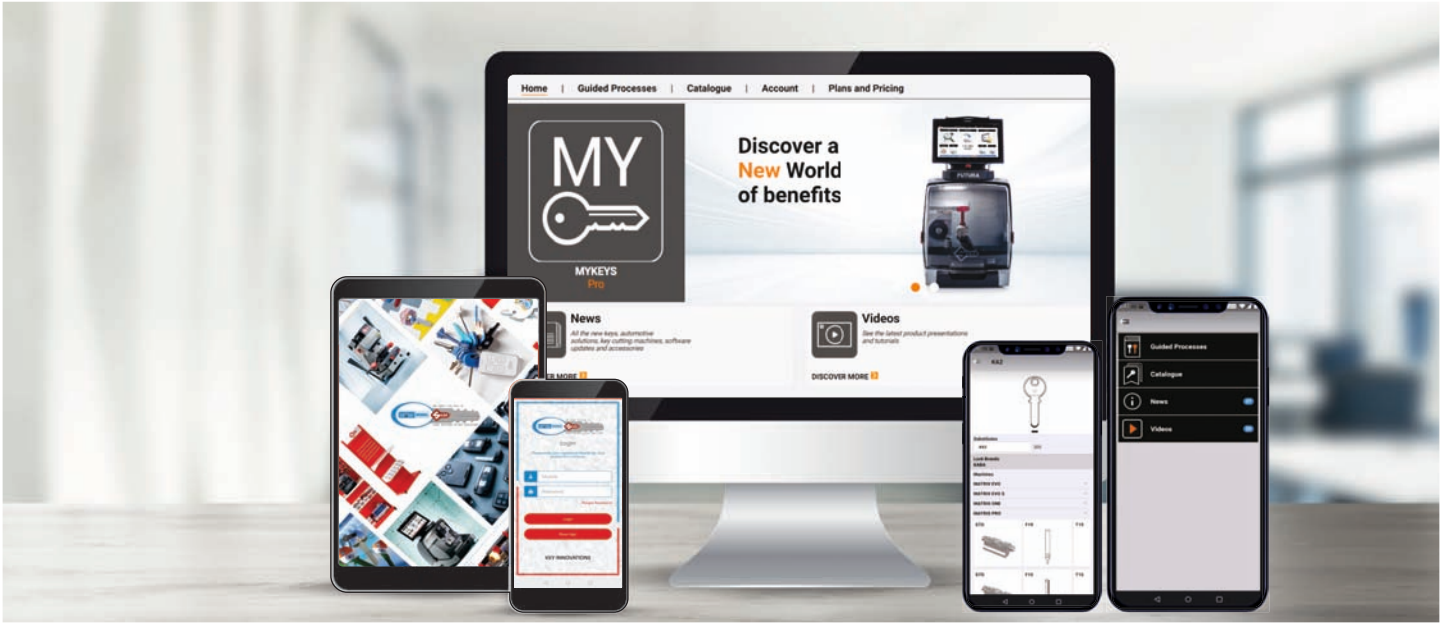

Silca offers a vast range of original consumables like cutters, tracers and brushes. All Silca consumables conform to the same guaranteed high quality levels that Silca delivers with key cutting machines.

GUARANTEED COMPONENTS

Original Silca components are designed and produced to respect the requirements of the CE standard. In cases of repair or substitution the CE standard is only guaranteed if original Silca spare parts are used. Silca

guarantees to supply parts for 7 years after the discontinuation of a product.

MYKEYS Pro

MYKEYS Pro is the essential tool for professional key cutters and auto locksmiths.

Access the most extensive key database in the world, consult key catalogues, see video tutorials, understand the right accessories and use the step-by-step key cutting guides to ensure that you get the absolute maximum from all your Silca key cutting equipment. Futura family and Matrix Pro family key cutting machines also offer 3D interactive animations to guide you on how to correctly position the key in the jaw for perfect cutting results.

Auto locksmiths can access all the vehicle key duplication information and receive programming guidance for over 5000 vehicle models.

Everything you need to offer the very best service to your customer, all in one place.

REMOTES AND COMPLEMENTARY PRODUCTS SEARCH

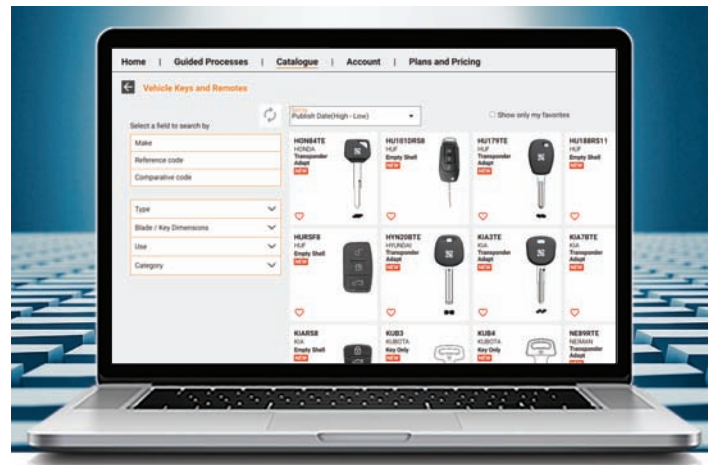

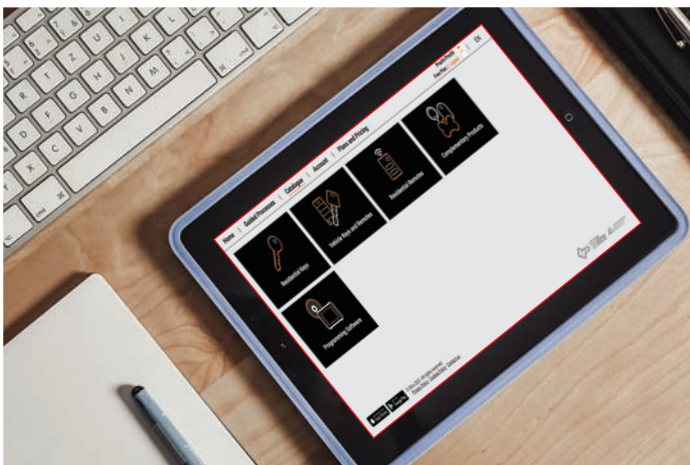

The Catalogue includes the assortment of Silca complementary products, such as key rings, engravable key tags, carabiners and snap hooks, together with the range of original residential remotes compatible with Silca Air4. Video tutorials guiding you through the programming procedures are available for numerous remote models. Registration is free at the catalogue. silca.biz.

MINDA SILCA SALES APP

Minda Silca App, Everything about

Keys, Key Duplication Machines & Automotive Devices.

The essential tool for Dealers, Silca Points owners & New professional key cutting. MINDA SILCA App enables user to do online ordering of Keys/ Key duplicating machine /AD tools / Accessories. One can access the most extensive range of Minda Silca products, latest key catalogues, see video tutorials, it's to ensure that user get the absolute maximum from all information provided in the app. Dealers, Silca Point owners & New locksmith professionals can access all the Information regarding Minda Silca key range, Key Duplication machine range, Accessories & users can also provide feedback in real time.

TRIAX PRO

FOR LASER AND DIMPLE KEYS, AND ENGRAVING

- Top performance, precision and quality
- Long-lasting components made of nickel-plated and stainless steel
- Cut keys counter for each cutter
- Easy-change jaws
- Quick-release cutter change system
- Weight 51.5kg

- Precise results when cutting steel and brass keys
- 360° rotating clamp, compatible with many optional accessories
- Blank key detection by electric contact
- Various optional tools for pump keys, central stop keys and others
- Patented laser decoder
- Duplicates by original, by decoding and by copy
- Stand-Alone use or with Silca Idea Program
- Job queue management via PC
- Weight 43kg

POKER PRO

FOR FLAT, VEHICLE AND CRUCIFORM KEYS

- Laser reader for quality cutting results
- Four-sided clamps: The sintered, four-sided clamps have an exclusive rotation system that facilitates the installation of a wide range of keys
- Visual and audible warnings
- The cutter and the carriage stop automatically when the safety shield is opened.
- Practical and ergonomic work station
- Optimized cutter wear : Specially designed control system regulates the carriage movement
- Clamps: rotating with four sides to perfectly secure keys, fitted both on the back or on the profile for keys with symmetrical cuts

Make your business incisive with the exclusive Engraving Kit and boost the potential of your Futura/Futura Pro.

The Engraving Kit is a set of accessories dedicated to engraving, compatible with all the Futura and Futura Pro key cutting machines. The special jaws, together with the adapter supplied, make it easy to install a wide variety of metal keys, small medals and plates, whilst the free software has been developed to guide you step-by-step through the creation and management of customised engraving models, designed for a vast range of references both from Silca and others.

OPTIMISED ENGRAVING FOR A WIDE RANGE OF KEYS, SMALL MEDALS AND PLATES.

The special jaws compatible with the 01R clamp and the plane 4 adapter are designed to facilitate the installation of a vast array of metal and aluminium Ultralite keys, small medals and plates, and feature 4 areas (or planes) for engraving items of different dimensions:

- Area 1: 26-32mm x 40mm;
- Area 2: 20-26mm x 40mm;
- Area 3: 8-14mm x 40mm;
- Area 4: 14-20mm x 40mm.

PRE-SET USER MODELS AND GUIDED PROCEDURES

The software includes over 220 default user models for just as many Silca references (keys, medals and plates), which identify the areas for inserting the text you want to engrave. For each reference, you can select the depth of the incision, whilst the software indicates the jaw step you should use.

MANAGEMENT OF USER MODELS

The software allows you to create customised engraving models through a user-friendly editor that enables you to add text areas, both on the front and rear of the key or medal, and to adjust their size and position within pre-set parameters.

ENGRAVING OTHER REFERENCES

With the command 'Customised' you can create new engraving models, not yet present in the database, by defining the available area. You can create a rectangle (typically used for engraving the blade) and a circle (typically used for the key head).

PRACTICAL USE OF THE ENGRAVING FEATURE

All the user models can be accessed both from the 'Engraving' main menu of the software and from the 'Cut' menu to engrave a compatible reference.

OPTIMISED PROCEDURES WITH THE JOB QUEUES

The software also manages job queues, with which you will be able to set the cutting/engraving parameters of a series of keys and, afterwards, process them. Depending on your needs, you can engrave all the keys first and then cut them, or vice versa. This will result in an optimised duplication with a significant reduction of time spent installing accessories.

QUALITY PERFORMANCE

The machine performance, in terms of engraving quality, varies according to the speed of the cutting tool:

- 7100 rpm for the Futura key machines;
- 12100 rpm for the Futura Pro key machines.

KIT COMPONENTS

The Engraving Kit is compatible with all the Futura and Futura Pro* models and includes:

- The 01E jaw (D748737ZB);
- The 02E jaw (D748739ZB);
- The plane 4 adapter (D750763ZB);
- The 18DW cutter (D748741ZB).

The software is free and already installed in the Futura/Futura Pro app. You can access it via the specific icon from the homepage of the app (version 2.1).

It is available starting from:

- The 3.3.0 software version for the Futura key cutting machines
- The 3.5.0 software version for the Futura Pro key cutting machines.

* The Engraving Kit is compatible with: Futura, Futura Japan, Futura One, Futura Automotive, Futura Automotive Token, Futura Light, Futura Pro, Futura Pro Japan, Futura Pro Automotive, Futura Pro Automotive Token, Futura Pro One.

PROGRAMING & CLONING DEVICES

CLONING DEVICE

RW4 PLUS, FAST COPY PLUS & M BOX

Transponder copying and writing RW4 Plus copies and writes quickly and accurately the following types of transponders:

- Texas[®] fixed code ID4C using Silca GTI,
- Temic[®], Philips[®] and Megamos[®] fixed code using Silca T5,
- Philips[®] Crypto ID40, ID41, ID42, ID4W and ID45 using Silca T10, T25, T28, T29 and T50 transponders,
- Philips[®] Crypto 2 ID46 using Silca GTI,

- Texas[®] Crypto ID4D using Silca GTI,
- Texas[®] Crypto 2 ID6F using Silca GTI,
- Texas[®] Crypto 3 ID6A using Silca GTI,
- Texas[®] Crypto 80 bit for Toyota[®], Hyundai[®], Kia[®] and Ford[®] using Silca T80+,
- Texas[®] Crypto 128 bit Toyota[®] 'H' 7A-39 using Silca T128C,
- Megamos[®] Crypto ID48-A and ID48-K using Silca T33,

- Megamos[®] Crypto ID48, ID48-A1, ID48-A2, ID48-A3 and ID48-A4 using Silca T48,
- NXP Hitag[®] 3 for Honda[®] ID49 using Silca T49,
- Holden[®] Commodore keys type 1 and 2.

Transponder generation in stand-alone mode

RW4 Plus is able to generate in stand-alone codes for certain fixed code transponders and Texas[®] Crypto 80 and 128 bit transponders used on popular Ford[®], Subaru[®] and Toyota[®] vehicles and to generate Hitag[®] 3 ID49-1C transponders for Honda[®]. For the most common models of the Fiat[®] group, RW4 Plus can also precode Philips[®] Crypto ID46 and Megamos[®] Crypto ID48 transponders using data read by the Advanced Diagnostics devices.

The cloning device for reading and copying in stand-alone mode a wide range of transponders. Fast Copy Plus detects the presence of fixed code and Crypto transponders in a vehicle key and identifies the type showing it on the display. The device can recognize the presence of several other transponders including Philips[®] Crypto 3, Megamos[®] Crypto 2 and Texas[®] AES transponders.

TRANSPONDER COPYING AND WRITING

Fast Copy Plus copies and writes quickly and accurately the

following types of transponders:

- Texas[®] fixed code ID4C using Silca GTI,
- Temic[®], Philips[®] and Megamos[®] fixed code using Silca T5,
- Philips[®] Crypto ID40, ID41, ID42, ID4W and ID45 using Silca T10, T25, T28, T29 and T50
- Philips[®] Crypto 2 ID46 using Silca GTI,
- Texas[®] Crypto ID4D using Silca GTI,
- Texas[®] Crypto 2 ID6F using Silca GTI,
- Texas[®] Crypto 3 ID6A using Silca GTI,

- Texas[®] Crypto 80 bit Toyota[®] 'G' ID6E-36 and Valeo[®] ID6E-37 using Silca T80,
- Megamos[®] Crypto ID48-A and ID48-K using Silca T33,
- Megamos[®] Crypto ID48, ID48-A1, ID48-A2, ID48-A3 and ID48-A4 using Silca T48,
- Holden[®] Commodore keys type 1 and 2.

The Silca ID49 Solution allows you to clone and pre-code 96 bit NXP Hitag* 3 transponders for a subsequent programming with a diagnostic device. For certain vehicles, the U-Snoop is needed to detect data directly from the car immobilizer unit. U-Snoop can substitute the Snoop and M-Snoop devices, used in the Silca ID46 and Silca ID48 Solutions respectively. The solution is available with a simple software update of the RW4 Plus and Fast Copy Plus to the 04.09.094 version. (The solution is not available for RW4 + P-Box and Fast Copy + P-Box)

PROGRAMMING DEVICE

SMART PRO

The state of the art OBD vehicle key programmer that works with most vehicle makes and models worldwide

Smart Pro is the cutting-edge, easy-to-use device for easily programming transponder keys, proximity keys and remotes and for reading the PIN codes for numerous manufacturers. It features an intuitive touch screen user interface and incorporates the entire Advanced Diagnostics Info Quest database with over 5000 vehicle models. It is a flexible, all-in-one solution offering the user a combination of purchase options.

EASY TO USE SOFTWARE INTERFACE

Smart Pro features a 10-inch colour touch screen guiding the user through a simple step-by-step sequence for all the key programming functions and procedures. The graphical user interface is intuitive and the software is available in multiple languages. Easy-to-read icons clearly indicate whether the device is successfully communicating with the vehicle or not.

ALL INFORMATION IN ONE PLACE

Smart Pro incorporates AD Info Quest, a constantly updated database containing over 5000 vehicle model details.

EXTENSIVE FUNCTIONALITY

Smart Pro programs transponder, proximity and slot keys and remotes and reads PIN codes for numerous manufacturers. Further functions include ECU identification, EOBD read and clear fault codes (manufacturer dependent), and archive of previously programmed vehicles.

SMART PRO: SMART CHOICE

FULLY GEARED AND READY TO OPERATE

Smart Pro comes supplied in a hard body carry case together with all the necessary cables and connectors to start working immediately. The case includes: Smart Pro device (AD2000), mains cable (ADC2009), OBD cable (ADC2000), AC/DC power supply unit (ADC2006), USB

EXTERNAL PORT FOR INCREASED POTENTIAL

Smart Pro features an expansion port and slot for Smart Aerial, so the user can read, preset and precode transponders without the need of other devices. The advanced, integrated security system means no other dongles or smartcards are required.

HIGH PERFORMANCE HYBRID

Smart Pro is an all-in-one, hybrid solution offering the flexibility to choose from a number of purchase options. You can opt for pay-as-you-go tokens, various UTP (Unlimited Token Plan) packs or you can simply purchase the software modules you use most. You can also change from one system to another according to the evolution of your business.

COMPATIBLE WITH THE SILCA AUTOMOTIVE RANGE

Smart Pro has been designed to be updatable over time and is fully compatible with the entire range of Silca transponders and vehicle

cable (ADC2004), 50 way to 25 way converter (ADC2001), pin saver (ADC2002), USB flash drive operating manual, printed quick start guide.

The case includes spaces for the optional Smart Aerial and Smart Remote Programmer.

GUARANTEED SOLUTION

Smart Pro has a 2-year warranty.

keys and remotes, including Remote Car Keys, Proximity and Slot Keys, Look A-like and transponder keys.

QUALITY MATERIALS

Smart Pro is supplied in a hard body carry case with internal rubber shaped slots for putting all the tools necessary to program keys and remotes. The screen is made of gorilla glass, a resistant and long-lasting material.

EASY TO POWER

Power is supplied to Smart Pro via the OBD port, mains cable or an internal battery that gives two hours of stand-alone use.

FAST PROGRAMMING PROCEDURES

The powerful quad core processor, new hardware and software architecture are designed to save you time. By integrating key programming and PIN reading functions for most makes into one step, the programming process is significantly faster.

UNIVERSAL CAR REMOTES & REMOTE CABLE

The Silca Universal Remote Car Keys are a range of quality remotes that, once programmed, duplicate the functions of the original vehicle key. They come in four different designs suitable for the most popular brands worldwide, feature three push buttons for lock, unlock and boot release, and incorporate a Silca quality retractable flip blade.

The Silca Universal Remote Cable connects the remote to the smartphone to pre-set a new remote in just a few seconds. You just need to select the vehicle model from MySilca SRP app and the cable enables pre-set data to be written onto the remote key.

HOW IT WORKS

With the Silca Universal Remote Car Key Solution duplicating original vehicle keys and programming remotes is easier than ever before.

1. Connect the Universal Remote Cable to your smartphone and search for the make, model and year of the vehicle key to pre-set in MySilca SRP app.

2. Connect the Universal Remote Cable to the Universal Remote Car Key. Make sure the battery is removed from the PCB during the pre-setting.

3. Click on Preset and the software immediately pre-sets the remote. The process requires just a few seconds.

4. If necessary, fit the Universal Remote Car Key with the relevant transponder. MySilca SRP app tells you what transponder to use.

5. MySilca SRP app tells you what CH blade you should use. Cut the CH key blade with a Silca key cutting machine.

6. Fix the CH blade onto the remote using the pin fixing tool supplied by Silca.

7. Program the transponder and the remote using Smart Pro. MySilca SRP app guides you through the entire operation.

8. Alternatively, clone the transponder using Silca RW4 Plus or Fast Copy Plus.

9. Program the remote manually. SRP contains a comprehensive database of manufacturer's on-board procedures.
