Minda Silca Engineering Pvt Ltd., was incepted in the year 2002 under A K Minda Group and was known as "Tuff Engineering Pvt. Ltd." Based at Noida, this company made a humble beginning under AK Minda Group (now known as SPARK MINDA, Ashok Minda Group), to provide Key Solution to all the other group companies.

SPARK MINDA, Ashok Minda Group is a leading manufacturer of Automotive Security Systems, Driver Information Systems, Plastic Injection-Moulded Interior Parts, Die-Casting, Keys and Key Duplicating Machines. The Group caters to the needs of all major Car, Motorcycle, Commercial Vehicles, Tractor and off-road vehicle manufacturers in India and overseas. The Group operates from 35 plants located in India, Germany, Poland, Czech Republic, Indonesia, Vietnam, Germany, Mexico, Uzbekistan with office in Japan. The Group also has several JVs with leading companies from USA, Japan, Italy, and Uzbekistan.

Minda Silca Engineering Pvt. Ltd. was formed in 2006, after a Joint Venture between Spark Minda, Ashok Minda Group & Silca S.p.A, Italy (a member of DormaKaba Group with annual turnover of 2.8 Billion CHF). Silca is the flagship company for the key business within DormaKaba Group. It is a leading European company for manufacturing key blanks, key-cutting machines and equipments dedicated to the production and key blanks processing. Silca also has a product range dedicated to key manufacturing and duplication & security products.

OUR VISION

"To be a dynamic, innovative and profitable precision component manufacturer for automotive as well as non-automotive organization with a special focus on keys & KCM, emerging as the preferred supplier and employer to create value for all stakeholders"

OUR MISSION

- Focusing on product innovation as the essential element to differentiate our offer.
- Looking after our customers needs granting them first class services.
- Upgrading of our production processes both in terms of efficiency and quality.
- Empowering human resources by means of continuous education and training as well as supporting professional growth within the company.
- Pursuing continuous improvement by promoting initiatives and responsibilities at individual and team level.

MINDA SILCA

Minda Silca does not merely represent a trade name, it is an approach to the market, a constant and intense dedication to product quality standards and above all a guarantee of innovation and quality for all the people operating in the world of duplication services.

OUR BUSINESS MODEL

Minda Silca's Business Model is a combination of direct and indirect business covering all the available distribution channels, distributing a complete range of key blanks and key cutting machines dedicated to key cutters, Shoe Bars, Locksmiths and to Industrial users.

KEY CUTTING MACHINES

Minda Silca's Key Cutting Machine System includes the production of machines and dedicated accessories for any type of duplication center up to the production of customized duplicating and originating systems for Lock and Automotive Industries.

Minda Silca's Key Machines product range is wide and very specialized, covering the needs of the key duplication business, including a dedicated range of transponder devices developed to support the most evolute requests.

Long time tradition and solid reputation build up over the years make Silca a very strong brand within this business segment.

ELECTRONIC DUPLICATION

In the eighties, Silca introduced, first in the world, the duplication based on code numbering, marking a technological turn around in the industry.

Now a days, Silca is still representing forefront technology in terms of performance and innovation, for the Lock and Automotive Industry and for Professional Locksmiths all around the world.

SILCA

Silca is the global brand of reference for the production of keys and the production of professional and industrial machines dedicated to key duplication. Silca has been responsible for the most important technological evolutions in key duplication such as the first electronic key cutting machine capable of copying keys

by code. Silca machines are born from a long tradition, from a know-how recognized at a global level and from the expertise and passion of engineers who understand keys in every detail.

QUALITY AND CERTIFICATIONS

Product quality is fundamental to Silca and we invest continuously to guarantee a level of quality that

is both independently certified and designed to last. The recognition received is the result of Silca's commitment to quality and sustainability.

SILCA HOLDS THE FOLLOWING STANDARDS:

- ISO 9001:2015,
- IATF 16949:2016 (Automotive Keys)

On Line Support

THE CATALOGUE

The Catalogue is the largest residential and automotive key database worldwide. The breadth and quality of the information available make it the essential tool to find the key you need. You can search residential keys by original make; or by make, model and year if you're browsing automotive keys. Additional filters can be applied to improve the results. You can also create personalized collections and print out key tags for your display, customizing them with information such as hook position and price.

MY KEYS PRO

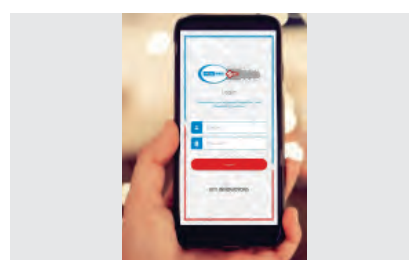

It is the essential tool for professional key cutters and auto locksmiths.

Access the most extensive key database in the world, consult key catalogues, see video tutorials, understand the right accessories and use the step-by-step key cutting guides to ensure that you get the absolute maximum from all your Silca key cutting equipment. Futura family and Matrix Pro family key cutting machines also offer 3D interactive animations to guide you on how to correctly position the key in the jaw for perfect cutting results.

MINDA SILCA SALES APP

The essential tool for Dealers, Franchise Businesses (SKAZ) & Locksmiths for online ordering of Keys/Key Duplication/Automotive Devices/Accessories.

Minda Silca App ensures that users get the absolute maximum from all the details given. Users can watch the Latest product Video tutorial, Product information Images, Catalogues, Manage Order History, Wish listings and Give Feedback.

Dear Client,

Our keys are exclusively produced with certified first pick raw materials.

Every single work phase is controlled and carried out with highly advanced machinery, prescribed product quality control certifies: dimensions, aesthetics, and respond to the original product and clients specific request.

Using the SPC (Statistic Process Control) procedure to every single working phase, we guarantee the quality, our customers expect from Minda Silca products. At the end of every work specific test, it assures constant quality, right up to the finished product.

Minda Silca Holds Following Certificate :

IATF :16949:2016 (1st edition, 2016-10-01),

ISO : 14001:2015 (Environmental Management System)

ISO : 50001:2018 (Energy Management System)

SILCA LIBRARY

This catalogue updates and completes the information regarding all the vehicle keys produced by Minda Silca. If you would like to keep your catalogues always updated, visit www.mindasilca.in and www.silca.biz. Every month you can find out what new keys have been produced by consulting the “Silca News” Bulletins.

ELECTRONIC KEY CATALOGUE

Silca also makes its electronic catalogue available to you, also on your smartphone. The Silca electronic catalogue will be updated in real time with all the new keys making it the ideal assistant for all office activities, the management of stock references, automatic creation of orders, printing packing lists and much more.

KEY IDENTIFICATION

Keys are drawn to a 1:1 scale. Identification of a key can be made by laying the key on the drawing, paying particular attention to the blade and profile. Alternative head shapes are indicated by images around the standard head.

Transponder Information

An electronic chip with a non-volatile memory which contains an ELECTRONIC CODE. The transponder has an antenna with which it can interface with an external electronic control device. Through the antenna the device emits a fixed frequency signal; the transponder receives the signal and then transmits its electronic code, by means of special modulation techniques, to the control device, which is able to process the code. The transponder has no external input of power supply (passive system): it receives the energy necessary to work from the signal emitted the external control device (inductive coupling between the control device antenna and that of the transponder).

IMMOBILIZER

An electronic antitheft system which interfaces with the engine control device, and often also with the starter, that allows the engine to start only when the electronic code in the transponder is recognized.

Symbology

FIXED ELECTRONIC CODE

Each key has a different electronic code. The code are fixed alphanumeric code(they are not rewritten when the engine is started).

ROLLING CODE

Each key has different electronic code. However, the codes are changed every time the key is used to start the vehicles engine. The procedure by which the code is changed is known only to the manufacturer of the immobilizer and is difficult to deduce by reading the transponder memory in the key.

CRYPTO CODE

The Crypto Code represents the latest generation of transponders and immobilizer systems (introducing bi-directional encryption of data). Internal protected algorithms will be configured to interpret the alternative messages changing at each cycle

MINDA SILCA ELECTRONIC KEY

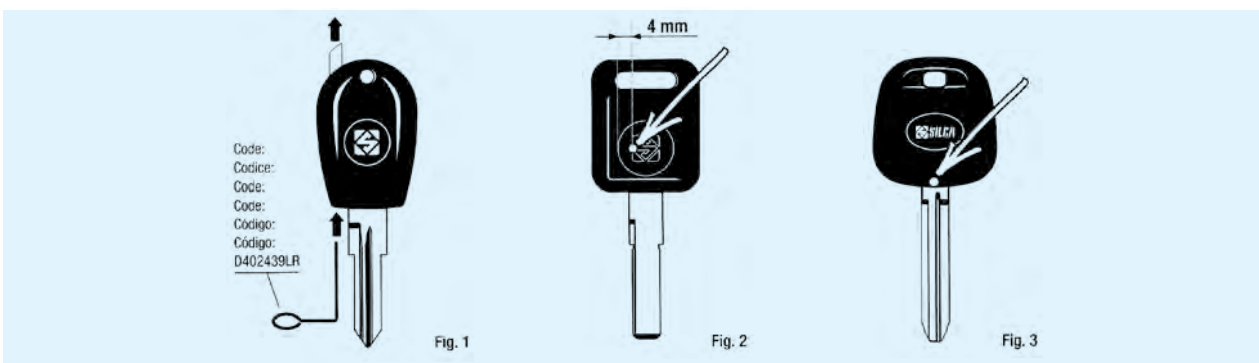

Electronic Card (with battery) that emulates the function of the Texas[®] Fix code type Transponder (4C) and Crypto Type Transponder and Philips[®] Crypto Type(46)

Transponder Replacement

TRANSPONDER REPLACEMENT (ONLY FOR MINDA SILCA KEYS)

it may be necessary to remove the Transponder due to an incorrect procedure or key-cutting error. If so, follow the instructions given below, according to the type of key:

- Key with a single plug (e.g. GT15RT2) : push out the plug through the hole in the lower part of the head, using a paper clip or preferably the accessory illustrated (fig. 1). Replace the Transponder and fit the plug in place.
- Key with a pair of plugs (e.g. HU66AT5): perforate the point shown in (fig.2). until the two plugs separate. Fit the Transponder and seal with two new plugs.
- Key with two shells (e.g. TOY43T2): starting from the point shown in (fig.3). separate the two shells with a flat screwdriver Fit the Transponder and re-assemble the key.

Silca offers a wide range of transponders enabling you to copy over 90% of vehicle keys available in market

Transponder Technology

Sophisticated software and data base are developed and dedicated to program and reproduce electronic automotive keys.

Silca has developed a special product range continuously updated with new electronic keys and transponder devices. Each new car model launched in the market represents Silca new keys, new softwares and devices to be engineered and produced.

Silca Software

The Silca Software Programs have become the standard language of the Professional Locksmiths.

Silca has always developed and produced in house the software upgrades specifically designed for its products. The data gathering from the four corners of the world has granted to the company, the possibility to make available to the Locksmiths - innovative software programs, relevant data base and info on each single key in the market.

After Sale Assistance

Continuous product updates and collection of relevant info from the market place guarantees Silca's clients to be always updated with the latest info and hence support customers in their every day job by a number of Assistance Centers, operating closest to the shops in the territory.

SILCA ID 49 SOLUTION

Silca ID49 Solution

The first worldwide solution for cloning NXP Hitag® 3 transponders for Honda®

Silca ID49 is the only solution available on the market for cloning ID49 transponders used on certain Honda® models manufactured from 2014. The solution

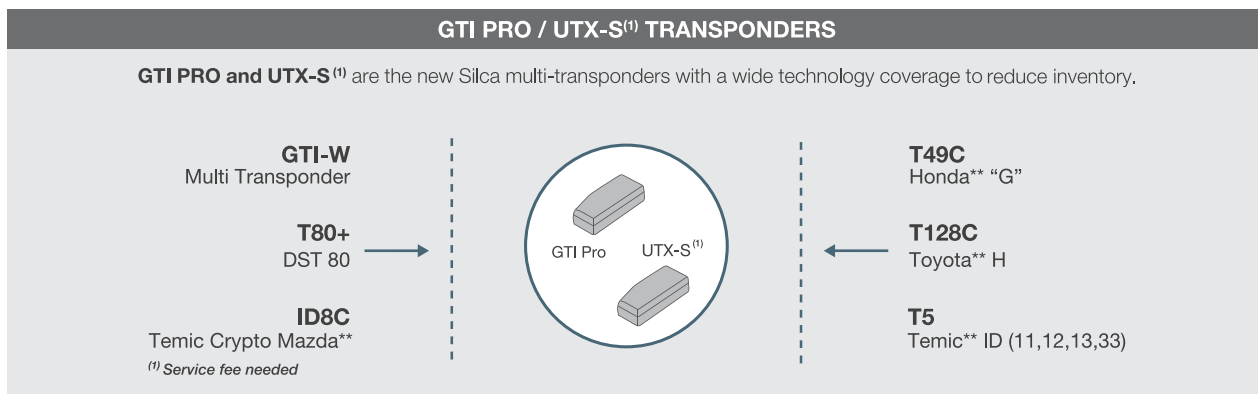

allows to duplicate a wide range of keys easily identified by the letter 'G' engraved on the blade and equipped with a 96 bit NXP Hitag® transponder.

GTI PRO & UTX-S TRANSPONDERS

The new multifunction transponders for cloning and programming the most common original car and motorbike keys

GTI PRO and UTX-S are the new Silca multi-transponders with a wide technology coverage to reduce the customer inventory. They are compatible with the existing Silca GTI-Wedge, T80+, ID8C, T49C, T128C, T5. These new multifunction transponders are for cloning and programming the most common original car and

motorbike keys. These two new transponders offer faster cloning and programming functionalities and being small in size, allows for greater versatility of use. In fact, it is compatible with the entire range of Silca vehicle keys and with the majority of original car and motorbike keys.

TOYOTA® "H" Solution-128C

Toyota* 'H' Solution

The exclusive cloning solution for Texas* 128 bit transponders for Toyota*

The Toyota* 'H' Solution allows you to clone Texas* 128 bit transponders for Toyota* models using 'H' type keys. You can also pre-set the transponder used on several Toyota* and Subaru* models for programming with a diagnostic

Free software update for RW4 Plus and Fast Copy Plus

With the Toyota* 'H' Solution you can clone the transponders of the most recent and popular Toyota* models using an 'H' type key by simply employing in stand alone mode the Silca RW4 Plus and Fast Copy Plus. You just have to update your device to the 04.08.093 version. The software update is free of charge.

Compatible with Silca keys

The Toyota* 'H' Solution is compatible with the Silca Look A-like, MH-TA and Flip keys, and with original vehicle keys.

Pre-setting available for programming the transponder

With the Toyota* 'H' Solution you can preset the transponder used on some Toyota* and Subaru* models, so that you can program it later with the Smart Pro device.

Familiar process

You can clone 128 bit transponders in exactly the, familiar way you clone other transponders.

No need to operate inside the car

The transponder can be cloned without the need to connect with the vehicle via a 'snoop' device making the process easier and more streamlined. No internet connection is required to complete the process

Transponder T128C Main Application		
- Cloning for Toyota* - Programming for Toyota* (🇯🇵 ID7A-39 - T128T) - Programming for Subaru* (🇯🇵 ID7A-17 - T128S)	The transponder can be pre-set for programming with a diagnostic device directly from the RW4 Plus key-board. Once pre-set, the transponder can no longer be used for cloning.	The Toyota* 'H' Solution has been designed and manufactured in conformity with CE mark European standards.

RW5

Cloud Cloning Solution

Silca RW5 is the fast, easy solution able to duplicate transponders for around 99% of cloneable vehicle keys in circulation, including ID46 and ID48.

Cloning calculations are made using Silca proprietary servers to guarantee reliability, ensuring that the latest routines are always available and time-consuming software updates are avoided.

The cloning process is guided step by step via a colour display with procedures up to 3 times faster than available devices. Full integration with the MYKEYS Pro ecosystem gives support and information across the entire vehicle key duplication process helping to deliver the best solution to the customer.

CLONING PROCESS

SMART Aerial+ Cloud Cloning Solution

The Smart Aerial+ from Advanced Diagnostics simplifies and speeds the key cloning process.

Cloning calculations are made using Advanced Diagnostics proprietary servers to guarantee reliability, ensuring that the latest routines are always available and time-consuming software updates are avoided.

Smart Aerial+ works hand in hand with the MYKEYS Pro app to guide the user through the entire cloning process, providing all the necessary information needed to deliver a perfect duplicate key.

CLONING PROCESS

Key Shells Range

The line of Silca Empty Shells is the ideal solution where the original key cannot be used due to a broken or damaged mechanical part, whereas the electronic part can be used on the Silca key and can be recovered.

Silca Empty Shells, a currently available Silca product line of plastic headed vehicle keys and spare parts designed to integrate the original electronic component of remote controls.

Practical one-piece package for optimized stock management and hook display.

TWINGO	2002	2007

Look A-like keys range

GTI is compatible with the new Silca Look A-like transponder keys series: a vehicle keys range with key head design identical to the original.

You will be able to easily recognize Silca Look A-like keys range thanks to the reference ending in TE (eg. FO10TE).

- Key head design identical to the original.
- Wide and continuously updated keys range.

The range of Silca proximity, slot and remote car keys is the perfect solution for replacing damaged or lost keys, or to have a duplicate in case of emergency. All the keys have a similar design as the original and are supplied ready-to-programme with the PCB, transponder and emergency or flip blade included. The keys can be programmed with Smart Pro and other programming devices and are packed individually in a plastic clamshell for easy identification and hook display

EXPAND BEYOND THE CORE

Our freestanding floor displays have been developed to present the , Silca accessories range in a professional way. Suitable as retail shop display or as compact key cutting work station where everything necessary to duplicate a key is close at hand.

This steel structure offers a compact key cutting work station where everything necessary to duplicate a key is close at hand.

- Dimensions: 62x180, 5x45cm.
- Takes weight up to 40 Kg and can be positioned at whatever height suits the user.
- Modular compartments for loose keys, consumables and accessories.
- Shelves and hooks can be placed as needed.
- Easy to transport and install.

CHIPOLO - Bluetooth Tracker

The smartest way to find your belongings. Chipolo is a small, colorful Bluetooth enabled device that easily attaches to your valuable items. With the free Chipolo app, locate any lost or misplaced item in seconds by ringing your it. Attach Chipolo to anything you don't want to lose. Connect it to the free Chipolo app. Ring Chipolo from the app or double press it to ring your phone. Even if it's on silent. Find your missing items. The app remembers when and where you last had them.

ATTACH

Chipolo to anything you don't want to lose Connect it to the free Chipolo app

FIND

Your missing items. The app remembers when and where you last had them.

RING

Chipolo from the app or double press it to ring your phone. Even if it's on silent.

Chipolo Bharat

Chipolo Confetti

Why the Chipolo ? Did you know that the average person spends 10 minutes a day looking for things they own but cannot find. We spent a great deal of effort, research and personal experience to design the Chipolo - a unique Bluetooth item finder that helps you locate your belongings.

For more info - <https://www.mindasilca.in/chipolo-bluetooth-key-finder.html>

SILICONE COVERS

Practical design created to protect your key from damages and scratches. Silca silicone cover are made of best quality silicon which are durable, flexible and odorless. Add colors to your key while making it easier for you to find the key in your bag, luggage & purse.

DIVERSIFY YOUR EXISTING BUSINESS

EXISTING BUSINESS + SKAZ = EXTRA INCOME

CAN BE INCORPORATED IN ANY BUSINESS TO GET BETTER INCOME, DIVERSITY & GROWTH...!!!

FUTURA AUTO

FUTURA AUTO - Designed for key cutters who want to enter the automotive key business. Futura Auto is the easy-to-use electronic key cutting machine with integrated tablet, developed for duplicating all types of car keys. It can also cut Bike, Car, Van and Truck keys, and most complementary keys used for petrol cap locks, glove boxes and roof racks. Futura Auto features the same unique, compact and practical design as the best-selling Futura range.

RW5 / SMART AERIAL PLUS

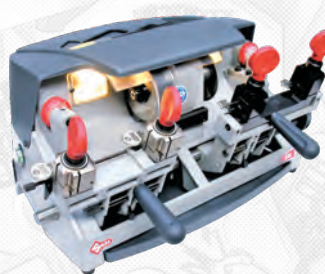

Silca RW5 & Smart Aerial Plus is the fast, easy solution & reliable to duplicate transponders for around 99% of cloneable vehicle keys in circulation, including ID46 and ID48. Cloning calculations are made using Silca proprietary servers to guarantee reliability, ensuring that the latest routines are always available and time-consuming software updates are avoided.

TWISTER II

Twister II is an easy to use, reliable and convenient mechanical key cutting machine delivering accurate and consistent duplicates of dimple, laser and Fichet® type keys. The machine provides a range of optional accessories for expanding its capabilities to tubular keys and to a wide range of vehicle keys.

DUO

MKCM for making copies of flat cylinder, vehicle keys and cruciform keys (left-hand carriage); bit & double bit keys and mail box keys (right-hand carriage). Duo is solid, reliable, accurate & is made of long lasting components.

SWIFT PLUS
